

K-Fix® Velcro

Type Kt.20

This type of K-Fix® element is suitable for attaching components using a Velcro with a 20 millimeter width. This method is always recommended where the item needs to be detached and re-attached quickly.

The expanded foam housing is black. The functional part, in polypropylene, for instance, is red as standard. Other RAL colours are available.

Pos.	Description	Type	Material	Weight [g]
1	K-Fix (shortened)	Av.10	EPP + PP	2.5
2	Velcro	Kt.20	PP + Velcro	0.9
