

K-Fix® Bore

Type Bo.05

This type of K-Fix® element is suitable for accepting a variety of components (e.g. rods, cables, bolts, pipes, etc.) with a through-hole of diameter up to 5,3 millimeters.

The expanded foam housing is black. The functional part, in polypropylene, for instance, is red as standard. Other RAL colours are available.

Pos.	Description	Type	Material	Weight[g]
1	EPP-Insert	universal	EPP	0,75
2	Thru-hole Ø 5,3	Bo.05	PP	2,1
